

AUTOMATIC SCHOOL BUS WASH SYSTEMS

- ▶ **Save time** and reduce driver error.
- ▶ Just pull in, park and let Westmatic's machines do all the work.
- ▶ Customizable configurations accommodate a variety of bus profiles.
- ▶ Modular design makes it easy to expand as your fleet grows and changes.

VEHICLE WASH SYSTEM OPTIONS

Add these accessories to boost the cleaning power and cost management for your new Westmatic Wash System.

- ▶ Pre-Soak (Multiple steps available)
- ▶ High-Pressure Chassis Wash
- ▶ High-Pressure Wheel/Rocker Panel Wash
- ▶ Spot Free Rinse
- ▶ Water Recycling
- ▶ Water Purification
- ▶ Rinse Aid/Wax
- ▶ Dryers
- ▶ Mounted Detail Wands

CHASSIS/UNDER-BODY WASH

- ▶ Remove dirt, oil and corrosive materials that can build up under your vehicles.

WHEEL WASH

- ▶ Optimized high-pressure spray pattern blasts away dirt, mud, road salt and other contaminants.

DETAIL WANDS/MANUAL SPRAY EQUIPMENT

- ▶ Ergonomically designed, these wands distribute water, soap and de-greaser.

DRYER SYSTEM

- ▶ Remove excess water from the vehicle after it exits the wash system. Low operating cost.

WATER TREATMENT SYSTEMS

Reduce your ecological impact and water/sewer costs by incorporating an efficient and compact water treatment system into your wash process.

Our Water Recycling System is fully automatic and low maintenance.

- ▶ Achieves water quality of 10 microns.
- ▶ Accelerates solids precipitation and eliminates odor.
- ▶ Recycles up to 85% of wash water.

The RENAREN Water Purification System has been installed in over 400 locations worldwide.

- ▶ Electro flocculation purifies oil mixed waste water. No chemical supplements are used. Water can reach a purification level of more than 99% prior to discharge into sewage system.

Service and Aftermarket Support

- ▶ Our nationwide service network of Westmatic-certified personnel and tech support keeps your system running smoothly. Preventive maintenance programs, spare parts and system upgrades are available as your needs evolve.

ENVIRONMENTALLY-FRIENDLY LARGE VEHICLE WASH SYSTEMS

▶ for the Toughest Fleet Washing Demands

TRUCKS

TRAINS

MOTOR COACHES

TRANSIT BUSES

SCHOOL BUSES

DPW/PUBLIC UTILITY VEHICLES

MINING & OVERSIZED VEHICLES

LESS WATER | LESS CHEMICALS | LESS ELECTRICITY

CHOOSING THE RIGHT MACHINE TO FIT YOUR NEEDS

- ▶ Purchasing your first machine?
- ▶ Replacing existing equipment?
- ▶ Building a new facility?

Our knowledgeable staff will help you determine the best equipment for your fleet. Fleet size, vehicle configuration and wash cycle are just a few of the factors that will help determine which system is right for your business.

Our systems are environmentally-friendly, using less water, fewer chemicals and less electricity. Our high-quality brushes provide the safest, most gentle friction cleaning in the industry.

**OUR MISSION:
PROVIDE OUR CUSTOMERS
WITH THE LOWEST
LIFE-CYCLE EQUIPMENT
ON THE MARKET TODAY.**

THE VIKING: TOUGH AND DURABLE FOR LONG-LASTING RELIABILITY

▶ Our newest machine, the **VIKING**, features a revolutionary, modular design that is infinitely customizable. This large vehicle wash system can be configured as a rollover/gantry or drive-through machine.

With a wide variety of equipment options, including gentle friction and touchless brush choices, the **VIKING** accommodates virtually any vehicle type and makes it easy to expand as your fleet grows and changes.

ROLLOVER/GANTRY WASH MACHINES

**LOW MAINTENANCE,
HIGH EFFICIENCY, VERSATILE**

▶ **This machine does all the work.** Our rollover/gantry systems do not rely on individual drivers to maneuver or drive through the wash process. In gantry setting, the driver is directed by traffic signals to pull in up to the gantry and park. The machine begins the selected wash cycle and moves down the vehicle on a floor-mounted track. Wash cycle times range from **5-10 minutes** per vehicle depending on the selected wash cycle options.

Westmatic's rollover/gantry systems can wash vehicles ranging from passenger sedans up to full-size tractor-trailers and are available in a full brush configuration, touchless or a combination of both.

DRIVE-THROUGH WASH SYSTEMS

**HANDLES A DEMANDING WASH
SCHEDULE IN A COMPACT DESIGN**

▶ **Need to wash 50+ vehicles every day? A Westmatic drive-through system may be the right choice.**

A reduced wash cycle time of approximately **90 seconds** per vehicle gets large fleets clean and back on the road in no time. Compact design reduces wash bay space requirements.

Our drive-through machines are simple to maintain and operate, requiring less than 30 minutes of preventive maintenance and mechanical adjustments per month.

TOUCHLESS/ SPECIALTY APPLICATIONS

**FOR LARGE AND IRREGULAR
SHAPED VEHICLES**

▶ This system is capable of self-adjusting to different widths and profiles of heavy duty vehicles including those used for military, construction and mining operations.

A Westmatic touchless drive-through system is also ideal for mixed vehicle fleets - such as those used by municipalities and school districts.

GET YOUR FLEET CLEAN AND READY TO ROLL BEFORE THE BELL RINGS

IDEAL FOR SCHOOL BUSES

- ▶ **Less downtime.**
- ▶ **Lower operating costs.**
- ▶ Mirror protection programming.
- ▶ Featuring the safest, most gentle friction cleaning in the industry.
- ▶ Certified maintenance pros and nationwide tech support keep your system up and running smoothly for years to come.
